

Single Color Auto-Chase LED

Converting to a **DYNAMIC PROGRAMMED LED SYSTEM** has never been easier, or more cost effective than now! Simply replace your existing lighting with the single color **AUTO-CHASE LED Module** and your job is done.*

- Runs on two wires – no more wiring in series
- Replaces existing flasher / chaser units
- Reduce your energy consumption by up to 80%
- Easy installation, no control system necessary
- Adds "flash" to your signage
- Directly replaces existing turbo type lighting
- Each unit is pre-programmed with over 15 different sequences
- Runs on low voltage – 24V AC transformer required*
