

# Color Changing Auto LED

Converting to a **DYNAMIC COLOR CHANGING LED SYSTEM** has never been easier, or more cost effective than now! Simply replace your existing bulbs with the color changing **AUTO LED** and your job is done.\*

- Reduce your energy consumption by up to 80%
- Easy installation, no control system necessary
- Adds "flash" to your signage
- A fraction of the cost of existing color changing systems
- Directly replaces existing turbo type lighting
- Each bulb is pre-programmed with over 30 different sequences
- Runs on low voltage - 24V AC transformer required\*
